INTRODUCTION

In 1997, the Massachusetts Department of Revenue (DOR) received nearly three million individual income tax returns for tax year 1996, representing over four million people. Each year, as DOR processes these incoming tax returns, it captures a vast amount of data on the income characteristics of the Massachusetts populace.

This *Statistics of Income (SOI)* report, the tenth of an annual series, presents a broad overview of these data in the form of aggregate Massachusetts individual income tax statistics for the 1996 tax year. The statistical tables, graphs and summary discussions contain a wealth of information on Massachusetts income, taxes, numbers and types of filers, exemptions, deductions and credits.

The body of income tax return data presented here is a valuable research tool that can be applied to public and private analyses that require an understanding of Massachusetts income. These data are particularly important to DOR because the individual income tax is the Commonwealth's principal source of revenue. With a net total of over \$7.0 billion in collections in fiscal year 1997, the income tax accounted for more than half of all state tax revenues. By achieving a broader dissemination of Massachusetts individual income tax statistics, it is hoped that this report will benefit the research conducted by interested citizens of the Commonwealth and their counterparts in other states.

In its content and organization, this report is modeled on the *Statistics of Income* published yearly by the Internal Revenue Service. However, unlike the IRS *Statistics of Income*, which is based upon a sample of tax returns, the statistics presented here is a compilation of all tax returns filed by Massachusetts taxpayers.

The report is divided into two parts. Part I, **Income Tax Structure and Income Concepts**, describes the set of rules that defined the Massachusetts income tax system in 1996 and income concepts used in this report. It examines who was taxed, what types of income were taxed, what tax rates were applied and the major income tax law changes for tax year 1996. The section ends with a more in-depth discussion of the definitions used to measure the income of Massachusetts filers.

Part II, **Statistics of Income**, begins with highlights of tax year 1996 data and summary profiles of the average Massachusetts filer, the average non-joint filer and the average married joint filer. This is followed by a series of tables and charts containing the statistics of income -- total amounts, counts, averages and percentages of income, taxes, exemptions, deductions and credits by category and income class. The tables are preceded by notes explaining the data and abbreviations used in them.

Following Part II is an **Appendix** which contains reproductions of the 1996 Massachusetts Form 1 and Form 1-NR/PY so that *SOI* data can be referenced to its source.

What's New in the *Statistics of Income* – 1996 Tax Law Changes

Compared to the 1995 Statistics of Income, there have been changes in the 1996 report to reflect changes in the law from the previous year. The changes are shown below.

- In 1996, personal exemption amounts were temporarily increased due to a budget surplus for State Fiscal Year 1996. The personal exemption amount for joint filers was increased to \$5,850 from \$4,400; for head of household filers the personal exemption was increased to \$4,520 from \$3,400; and for single or married filers filing separately the personal exemption was increased to \$2,925 from \$2,200.
- In 1996, the no tax status and limited income credit thresholds, determined in part by personal exemption amounts, were increased. For joint filers, no state income tax was due if Massachusetts adjusted gross income (Mass. AGI) was less than \$13,450 plus \$1,000 per dependent; joint filers were eligible for the limited income credit if Mass AGI was less than \$23,538 plus \$1,750 per dependent. For head of household filers, no state income tax was due if Mass. AGI was less than \$12,120 plus \$1,000 per dependent, and head of household filers were eligible for the limited income credit if Mass AGI was below \$21,210 plus \$1,750 per dependent. For single filers and married couples filing separately, there was no change to the income thresholds for no-tax status and the limited income credit. Single filers paid no tax if their income was less than \$8,000, and single filers were eligible for the limited income credit if their income was below \$14,000.
- In 1996, the law governing capital gains taxation was changed. Applicable to tax years beginning on or after January 1, 1996, tax rates on capital gains from assets held for more than one year (excluding collectibles) were reduced. Rates are now based on the length of time an asset is held. Gains from assets held more than one year but less than or equal to two years are taxed at 5%; gains on assets held between two and three years are taxed at 4%; gains on assets held between three and four years are taxed at 3%; gains on assets held between four and five years are taxed at 2%; gains on assets held between five and six years are taxed at 1%; and gains on assets held for more than six years are not taxed. Since holding periods are deemed not to have begun until on January 1, 1995 regardless of when an asset was actually purchased, for tax year 1996 the longest possible holding period is between one and two years, with a corresponding tax rate of 5%. Prior to 1996, gains from the sale of assets held more than one year were taxed at a rate of 12%, but only after applying a 50% exclusion to such gains, resulting in an effective rate of 6% on long-term capital gains.
- With the change in the way capital gains are taxed a new type of income, "Part C", was created, and Part A income was modified. In general, Part C income includes income that was included in part A in previous years – namely, long-term capital gains. In 1996, Part A income consisted of interest income, dividend income, short-term capital gains (capital gains on sales of assets held less than one year) and gains from the sale of collectibles.
- Due to the inclusion of all long-term capital gains as part of taxable income in 1996 (compared to only 50% of long-term capital gains income, taxed at 12%, in prior years), taxpayers with long-term capital gains may fall into a different adjusted gross income category in 1996, even though their actual income may not have changed. For example, a taxpayer with \$50,000 in wage income and \$20,000 in long-term capital gains in 1995 would have reported as taxable income only half of the capital gains income (\$10,000, which would have been taxed at a rate of 12%), for total 1995 taxable income of \$60,000. The same taxpayer with \$20,000 in long-term capital gains income in 1996 would have reported the entire amount as taxable income, (which would have been taxed at 5% in 1996), for a total taxable income of \$70,000. This should be kept in mind when comparing AGI income classes in 1996 to those in previous years. Because of the change in the way capital gains income is accounted for, the 1996 income distribution shifted upward.
- In 1996, statistics on capital gains filers have been broken out into three tables: short-term capital gains, long-term capital gains excluding collectibles, and long-term capital gains on collectibles, are reported in the Table II-3 series of this report. In prior years, only aggregate capital gains income (which included short-term, long-term, and gains on the sale of collectibles) were reported.

- In 1996, long-term capital gains were reported separately on the Massachusetts Form 1 (from which DOR captures tax return information); however, short-term capital gains and interest and dividend income did not appear separately on Form 1, but were combined in one “12% income” line. Therefore, the statistics for interest/dividend income, short-term gains and gains on the sale of collectibles shown in Table II-13 were estimated using statistical procedures.

Information about other tax law changes is available in the *1996 Massachusetts Tax Forms* or the *Guide to Filing Your 1996 Massachusetts Income Taxes*.

I. INCOME TAX STRUCTURE AND INCOME CONCEPTS

This overview begins by describing the structure of the Massachusetts personal income tax, or the process by which one moves from all income potentially subject to taxation to taxable income. This description is followed by a discussion clarifying the differences between the income concepts explained below, those used to generate these statistics of income, and widely recognized income concepts such as the U.S. Census Bureau's "total money" income.

INCOME TAX STRUCTURE

Chart I-1 on the following page lists each of the steps taken to compute one's income tax liability in Massachusetts. These steps are discussed below.

Gross Income

Gross income is the total amount of income that is potentially subject to taxation. The amount of gross income an individual receives during the tax year generally determines whether a Massachusetts income tax return must be filed. Married couples and individuals who received gross income less than \$8,000 are not required to file a tax return. Nonresidents, however, are required to file a tax return if they received Massachusetts source income in excess of \$2,925 if single or \$4,520 if married filing jointly.

In tax year 1996, Massachusetts gross income was tied to the federal definition of gross income in effect on January 1, 1988. Not all income is included in gross income. For example, neither federal nor Massachusetts gross income includes certain transfer payments, such as public welfare assistance, Veterans' Administration disability payments, G.I. Bill education payments, and workers' compensation; gifts; and certain accident and life insurance payments.

Massachusetts gross income does not include certain items which are included in federal gross income and vice versa. Unlike federal gross income, Massachusetts gross income does not include interest on obligations of the U.S. government and social security benefits, while federal gross income includes part of the social security benefits of high income taxpayers. Also unlike federal gross income, Massachusetts gross income does include interest from obligations of states and their political subdivisions, other than Massachusetts and its political subdivisions; income earned by a resident from foreign employment and excluded from federal gross income; and certain contributions to tax-deferred annuities.

In tax year 1996, Massachusetts gross income was divided into three categories, Part A (investment income), Part B (earned and other forms of income) and Part C (long-term investment income). Because Article 44 of the Massachusetts Constitution requires that all income of the same class be taxed at the same rate, Massachusetts applies flat tax rates to each category. In 1996, Part B income was taxed at the rate of 5.95%, Part A income was taxed at 12%, and Part C income was taxed at 5%.^{*} The specific types of income included in each category are listed in **Chart I-2**.

^{*} In 1988 and prior years, Massachusetts gross income was divided into the same two income categories, Part B, taxed at 5% and Part A, taxed at 10%. In 1989, Part B income was divided into two classes: Part B taxed at 5.375% and Part C taxed at 5% (the definition here for Part C income is different than above Part C income). (See Chart 1-2 and footnote.) In 1990, the distinction between Part B and Part C income remained, but both income types were taxed at 5.95%. In addition, the Part A rate increased to 12% from its previous rate of 10%. In 1991, the distinction between Part B and Part C income was fully eliminated; Part B income was taxed at 6.25% and Part A income continued to be taxed at 12%. In 1992, the tax rate on Part B income was reduced from 6.25% to 5.95%. These rates were in effect for tax year 1996, the period covered by this report.

Chart I-1: Computation of Federal and Massachusetts Personal Income Taxes, 1996

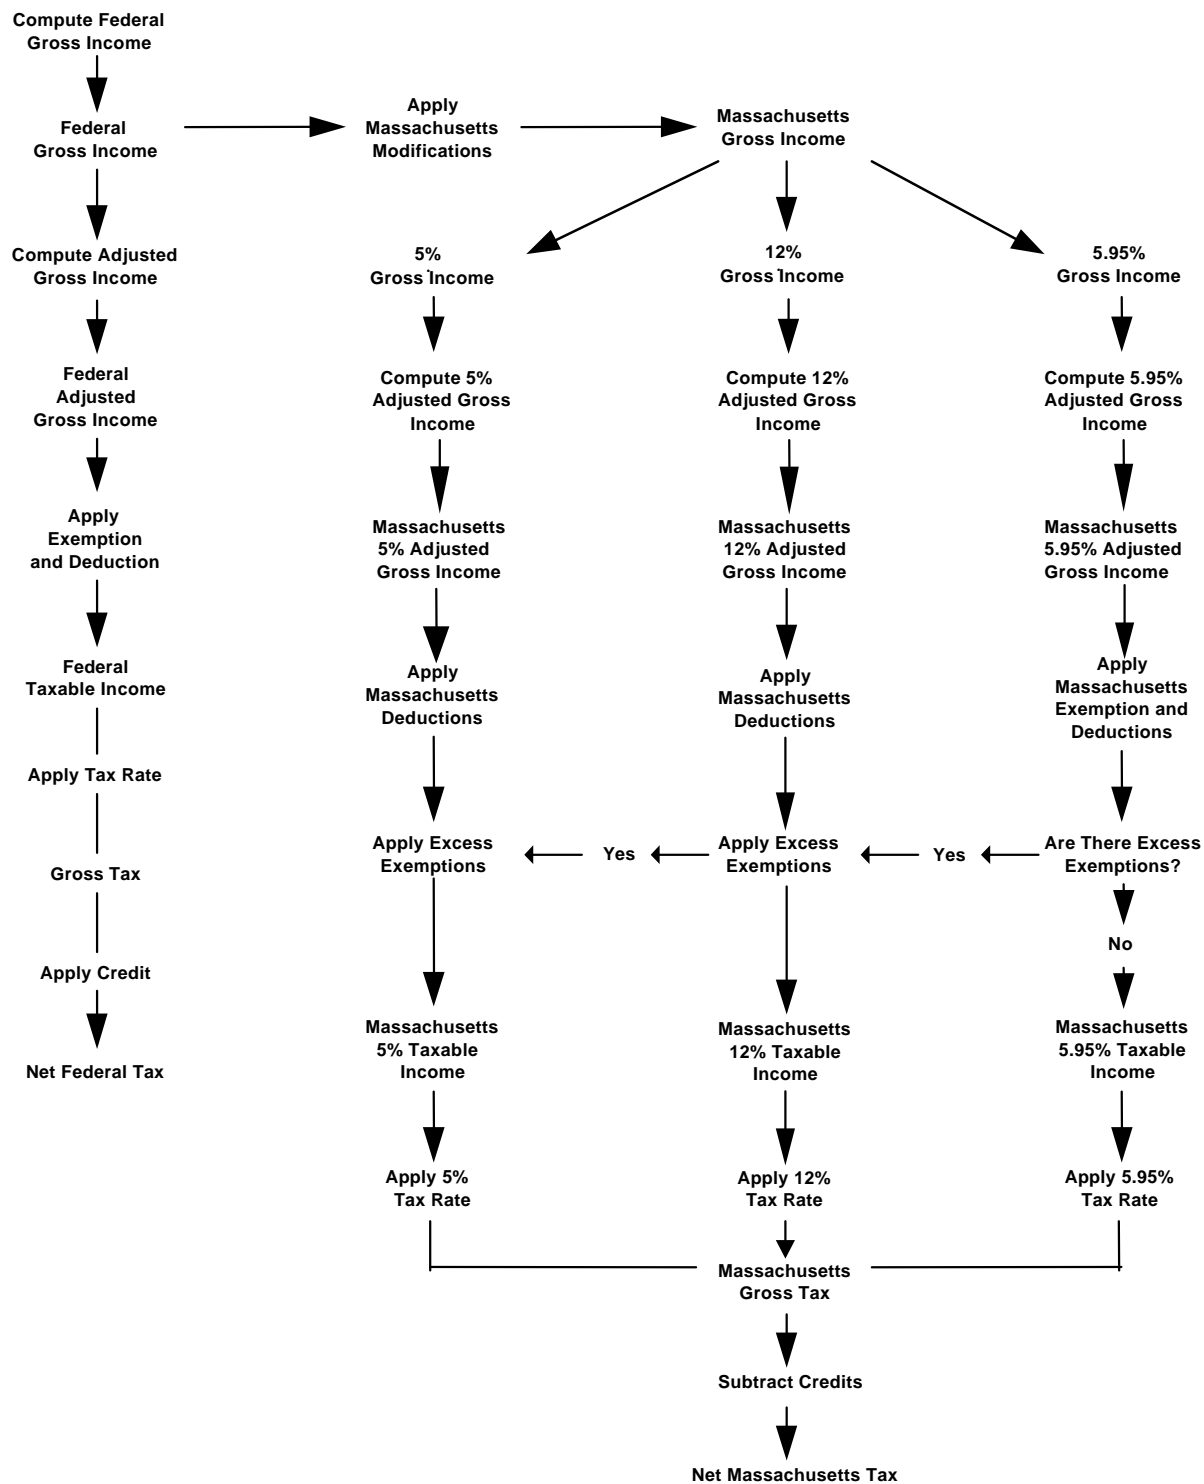

Chart I-2: Categories of Massachusetts Gross Income

Part A, 12% Income	Part B, 5.95% Income	Part C, 5% Income
---------------------------	-----------------------------	--------------------------

Interest (other than Mass. bank interest)	Wages, tips and salaries	Long-term capital gains excluding collectibles
Dividends	Business/profession/trade or farm income	
Long-term capital gains on collectibles	Partnership and S corporation income	
Short-term capital gains	Royalty and REMIC income	
	Other income (winning, fees, etc.)	
	Pension and annuity income*	
	Alimony received*	
	Rental income from real estate*	
	Unemployment compensation*	
	Taxable IRA/Keogh distributions*	
	Massachusetts bank interest*	

Massachusetts Adjusted Gross Income

Massachusetts Adjusted Gross Income (AGI) is an intermediate step between gross income and taxable income. It is equal to Massachusetts gross income after certain deductions or the sum of adjusted 5.95%, adjusted 12% and adjusted 5% income.

AGI is used to determine eligibility for No Tax Status (NTS), the level at which a filer has no tax liability. In 1996, the adjusted gross income threshold for NTS was \$8,000 for single filers, \$13,450 plus \$1,000 per dependent for married couples filing jointly and \$12,120 plus \$1,000 per dependent for head of household filers. Massachusetts Adjusted Gross Income is also used to determine the Limited Income Credit (LIC), a provision designed to benefit taxpayers who are slightly above the No Tax Status threshold. In 1996, the LIC was available to single filers with Massachusetts Adjusted Gross Income between \$8,000 and \$14,000, for couples filing jointly with income between \$13,450 and \$23,538 plus \$1,750 per dependent, and for head of household filers with income between \$12,120 and \$21,210 plus \$1,750 per dependent. Married taxpayers who file separate returns cannot benefit from either of these provisions.

* Classified separately as Part C income in 1989 and 1990. See previous footnote.

Adjusted 5.95% Income

To reach adjusted 5.95% income, specific Part B income items are adjusted for the cost of producing the income. For example, adjusted 5.95% income includes business income after deductions for ordinary business expenses. Additional deductions are allowed against 5.95% income for alimony paid, allowable employee business expenses, the penalty on early savings withdrawal and contributory pension from another state or political subdivision. If allowed deductions are greater than gross 5.95% income, then adjusted 5.95% income is reported as a loss for 1996. In certain cases, the excess deductions may be applied against 12% income and 5% income.

Adjusted 12% Income

Adjusted 12% income is the sum of adjusted interest and dividend income and part adjusted capital gains income. To reach adjusted 12% income, excess deductions from 5.95% income are applied against gross interest and dividend income and adjusted capital gains. The excess deductions from 5.95% income can only be taken against capital gains, interest, and dividends that are derived from or connected with a trade or business. To reach adjusted capital gains, gross short-term capital gains and long-term capital gains on collectibles are reduced by previously unused short-term capital losses. Taxpayers can then deduct 50% of their long-term gains on collectibles net of any adjusted short-term losses. Because of this 50% deduction, in 1996 long-term capital gains on collectibles were effectively taxed at 6%.

Adjusted 5% Income

Adjusted 5% income is the adjusted long-term capital gains excluding collectibles. To reach adjusted 5% income, excess deduction from 5.95% income is first applied to against 12% income; the remainder of the excess deductions are then applied against 5% income.

Taxable Income

Taxable income is Massachusetts Adjusted Gross Income after certain other deductions and exemptions have been taken. Deductions against adjusted gross 5.95% income include the deduction for payments made to social security and other government pension plans, the rental deduction, and the child care deduction. Exemptions from 5.95% income include the personal exemption, the dependent exemption, the exemption for persons aged 65 or over, the medical and dental expenses exemption, the exemption for the blind, and the adoption agency fee exemption. In addition, a separate exemption is allowed for Massachusetts bank interest.

Under most circumstances taxpayers are allowed to apply excess exemptions from 5.95% income against 12% income first, then 5% income. Excess exemptions are available when total exemptions (less the Massachusetts bank interest exemption) are greater than 5.95% income after deductions.

For purposes of calculating tax, 5.95%, 12% and 5% taxable income cannot be less than zero.

Tax Liability

Taxes owed are calculated by multiplying 5.95% taxable income by 0.0595, 12% taxable income by 0.12, and 5% taxable income by 0.05. The total tax liability is then adjusted for tax credits and voluntary contributions.

INCOME CONCEPTS

The income definition used to produce the statistics of income, Massachusetts *Net* Adjusted Gross Income, is different from Massachusetts Adjusted Gross Income, the income definition used as an intermediate step in determining tax due and eligibility for No Tax Status. In addition, federal and Massachusetts definitions of gross income differ from other common definitions of income, including the widely recognized U.S. Census Bureau definition of “total money” or household income. What follows is a discussion of these income concepts for the purpose of clarifying potential confusion over differences between each.

Massachusetts Net Adjusted Gross Income

Many of the statistics of income in this report are tabulated according to income class. These income classes are based not on Massachusetts Adjusted Gross Income (AGI), but on Massachusetts *Net* Adjusted Gross Income (Net AGI), which has been created from tax return line items specifically for the *Statistics of Income* in order to simplify the calculation and analysis of income statistics.

The main difference between Net AGI and AGI is the way each adjusts 5.95% income and combines it with 12% income and 5% income when there is a 5.95% loss. In short, Net AGI is the sum of line items 10, 21a and 22a from the 1996 Massachusetts Form 1, and the sum of the corresponding amounts from Forms 1-NR/PY (see **Appendix**), or:

1. Massachusetts gross 5.95% income *or* loss after deduction of ordinary business expenses and certain other deductions related to the cost of producing income, but before deductions for alimony paid, allowable employee business expenses, penalties for early savings withdrawal, and contributory pension from another state or political subdivision, which are included in the definition of AGI. Also, Net AGI accounts for the Massachusetts bank interest exemption, which AGI does not.

plus

2. Adjusted gross 12% income.
3. Adjusted gross 5% income.

On balance, filers' Net AGI is lower than their AGI. This is because Net AGI effectively allows *all* 12% income to be offset by 5.95% losses, unlike AGI which only allows 12% income connected with a trade or business to be offset by 5.95% losses. For most filers, the difference between Net AGI and AGI is quite small.

The following simplified example, displayed below, serves as a further illustration of the differences between AGI and Net AGI: A filer reports a 5.95% loss of (\$60,000) on line item 10, zero additional 5.95% deductions allowed under the definition of AGI, and positive 12% income of \$30,000 (not connected with a trade or business) on line item 21, and zero 5% income. He or she will have a negative Net AGI of (\$30,000) and a positive AGI of \$30,000, because none of the (\$60,000) 5.95% loss can be used to offset the positive 12% income. This example also demonstrates that some filers' AGI can exceed the NTS threshold, and thus incur a tax liability, even when Net AGI is below the NTS threshold.

Example

Calculation of Massachusetts Net Adjusted and Adjusted Gross Income

	Mass. Net AGI	Mass. AGI
5.95% Income (Loss)	(\$60,000)	(\$60,000)
Adjusted 12% Income	\$30,000	\$30,000
Adjusted 5% Income	\$0	\$0
Total	(\$30,000)	\$30,000

NOTE: To simplify this comparison the example above assumes that the Mass. bank interest exemption and certain deductions allowable only in Mass. AGI are zero and that the 12% income is not connected with a trade or business.

Total Money Income Versus Massachusetts Gross Income

Gross income, the broadest concept of income used for Massachusetts and federal tax purposes, differs from other common definitions of income. The most widely recognized definition of income is the U.S. Bureau of the Census definition of "total money" income or household income. In the chart on the following page, the components of total money income are compared to those included in Massachusetts gross income. As shown in this diagram, there are two important distinctions between gross income and total money income.

First, total money income includes all government cash payments, many of which, like Social Security and public assistance payments, are not included in Massachusetts gross income. Because such transfer payments are an especially important source of income for low income households, total money income better represents the incomes of the poor, which Massachusetts gross income will tend to understate.

Second, unlike Massachusetts gross income, total money income does not include capital gains. Because capital gains tend to be a significant source of income for higher income households, total money income will tend to understate the incomes of the wealthy.

The arrows in the diagram indicate that most other components of total money income have counterparts in Massachusetts gross income. However, there generally are definitional differences between like components, which in some cases can be significant. One example is self-employment income. In total money income, self-employment income is defined as net income after the deduction of ordinary business expenses. In Massachusetts gross income, however, self-employment income is included *before* the deduction of such expenses.*

Total Money Income Versus Massachusetts Net Adjusted Gross Income

Massachusetts Net Adjusted Gross Income, the income measure used to produce the statistical tables of this report, is derived from Massachusetts gross income. As a result, many of the same distinctions between total money income and gross income also apply to Massachusetts Net Adjusted Gross Income.* Most importantly, like gross income, Massachusetts Net Adjusted Gross Income does not include most government cash payments and does include capital gains. For the reasons explained above, Massachusetts Net Adjusted Gross Income therefore tends to better represent the incomes of higher income filers than of lower income filers.

* Further information on total money income may be obtained from the following report: U.S. Bureau of the Census, Current Population Reports, Series P-60, No. 197, *Money Income in the United States: 1996 (With Separate Data on Valuation of Noncash Benefits)*, U.S. Government Printing Office, Washington, DC, September, 1997.

* Massachusetts Net Adjusted Gross Income is a somewhat closer approximation of total money income for two principal reasons: (1) similar to total money income, self-employment income and rental income are net of ordinary business expenses, and (2) capital gains on collectibles are less than they would otherwise be because they are net of the 50% capital deduction.

Chart I-3: Principal Components of Total Money Income and Massachusetts Gross Income

PRINCIPAL COMPONENTS OF:

An equivalent income component is included in both income concepts, but the definitions of the component are not an exact match.

- NOTES:**
- (1) The standard income definition used by the U.S. Bureau of the Census to measure the Income of persons, households and families.
 - (2) Some government cash transfers, such as government payments of worker's compensation, unemployment compensation and government employee pensions, are included in separate income categories. The value of non-cash transfers, such as food stamps and Medicaid, is not included in money income.
 - (3) Excludes interest earned on obligations of the United State, and the Commonwealth and its political subdivisions.

SOURCE: Massachusetts Department of Revenue

II. Statistics of Income

1996 Highlights

- For 1996, a total of 2,959,558 returns were filed. Of these 48.0% were from single filers, 41.0% were from married couples filing joint returns, 2.0% were from married individuals filing separate returns, and 9.0% were from head of household filers. The number of returns filed was 1.17% higher than for 1995.
- Total 1996 Massachusetts Net AGI was \$129.7 billion. This was 10.7% higher than 1995 total Massachusetts Net AGI.
- Wages and salaries increased by 5.7% in 1996. In 1996, wages and salaries increased to \$98.5 billion from \$93.2 billion in 1995, an increase of \$5.3 billion.
- Wages and salaries were the single largest source of income, representing over 76.0% of all income reported.
- Chart II-1 below shows the relative importance of major types of income reported on Massachusetts income tax returns for tax year 1996. Business and professional income, Massachusetts bank interest and other types of 5.95% income, account for 14.3%, while 12% income from short-term capital gains, long-term capital gains on collectibles, and interest and dividends account for 3.4%, and 5% income from long-term capital gains excluding collectibles account for 6.2%.

Chart II-1: **Massachusetts Income by Sources,
As a Percent of Massachusetts Net AGI
All Filers, 1996**

- The number of taxpayers age 65 and over increased. While the number of returns claiming at least one person 65 or older increased 1.3% to 339,693 from 1995 to 1996, the share of such returns rose by only 0.02% during this same period.
- Returns claiming No Tax Status decreased, and the number of returns claiming the Limited Income Credit also decreased. The number of returns claiming No Tax Status decreased by 1.9% to 436,470 in 1996. Returns claiming the related Limited Income Credit in 1996 decreased by 25,868 or 8.1% to 294,310 returns or 9.9% of all returns.
- In 1996, filers who claimed part-year residents or nonresidents increased. The number of returns filed by persons who claim residence outside of Massachusetts or part year residents increased by 3.0% to 310,879. Part year residents and nonresidents' share of the tax returns show an increase of 0.2%.
- In 1996, positive business and professional income or sole proprietor income rose 3.8% and business losses decreased 8.4%, compared with the 1995 levels. The net effect of the growth in income and losses was an increase in net business and professional income of 4.8% from the prior year.
- Combined positive income from rent and royalties, partnerships, S corporations, and trusts was \$7.1 billion or a 12.6% increase, offset by combined losses of \$2.0 billion, a 7.0% decrease; thus net income in this category thus was approximately \$5.0 billion or a 23.1% increase from 1995.
- Pensions and annuities income showed an increase of 8.7% in 1996, from \$3.1 billion to \$3.4 billion.
- Combined income from the categories business and professional income, rentals, royalties, partnerships, S corporations and trust, showed growth of 8.4% and a decrease in losses of 7.3%, for a total net increase of a 12.7% over 1995.
- Interest income from Massachusetts banks for 1996 showed an increase. For 1996, \$2.09 billion was reported as interest income from Massachusetts banks. After exemptions, income from Massachusetts banks was \$1.91 billion. The after-exemption interest rose almost \$0.14 billion or nearly 7.9% from 1995.
- Dividend and interest income taxed at 12% increased \$0.30 billion to \$3.85 billion in 1996. This was an increase of 8.6% from 1995.
- Taxable capital gains income increased from 1995, though because of changes in the way capital gains were reported, direct comparisons are not available. However, estimated short-term capital gains were \$884 million, and reported long-term capital gains excluding collectibles were \$8.1 billion.
- Taxable 5.95% income increased by 3.9% or \$3.6 billion, to \$96.1 billion; taxable 12% income decreased by 32.5% or \$2.1 billion to \$4.4 billion (due to the change in the way long-term capital gains were reported), and taxable 5% income (i.e., long-term capital gains, a new reporting category in 1996) was \$8.0 billion. Total taxes before credits increased by 5.7% or \$0.36 billion to \$6.6 billion, and net tax increased by 5.9% or \$0.36 to \$6.4 billion in 1996.

Average Filer Profiles

In this section we profile the average Massachusetts taxpayer, as well as the average non-joint filer and the average joint filer. In these profiles, all averages are calculated as the arithmetic mean, the total amount of income (or exemptions or credits) reported by taxpayers divided by the number of taxpayers reporting. At the end of this section, median income amounts are also reported. Median income is the amount of income at the center of the income distribution, with 50% of taxpayers reporting more income than the median, and 50% reporting less.

The Average (Arithmetic Mean) Filer

A total of 2,959,558 returns were filed in 1996. The average Massachusetts filer reported Massachusetts Net Adjusted Gross Income of \$43,811. This was \$3,768 or 9.4% more than the average filer's 1995 income of \$40,043. Wages, tips, salaries, Massachusetts bank interest and other 5.95% income amounted to \$39,575 or 90.3% of the average filer's gross 1995 income. The average filer reported \$1,508 or 3.4% in 12% income from short-term capital gains, long-term capital gains on collectibles, and dividends and interest from sources other than Massachusetts banks, and \$2,728 or 6.2% in 5% income from long-term capital gains.

After claiming \$7,514 in deductions and exemptions, the average filer had a total of \$36,667 in taxable income. This average Massachusetts filer owed taxes of \$1,932 for 5.95% income, \$179 for 12% income, and \$136 for 5% income, for a total tax of \$2,246. The average filer was able to claim \$71 in tax credits, reducing the final tax bill to \$2,178. After taking all exemptions, deductions, and credits into consideration, the average taxpayer was taxed at an effective rate of 5.0%.* This is 0.2% lower than the 5.2% effective rate of 1995.

At \$2,178 the average filer's final tax bill for 1996 was \$98 or 4.7% higher than the average filer's 1995 tax bill of \$2,080. This nominal increase resulted from the average filer's higher income. From 1993 to 1996 the average filer's earned income rose 14.9%, while total tax rose 18.1%, reflecting higher total 12% income in 1996. The income and taxes of the average Massachusetts filer for 1993 through 1996 are summarized in **Table II-A**.

Table II-A: The Average (Mean) Massachusetts Filer, 1993-1996

	1993	1994	1995	1996
Part B (5.95%) Income	\$34,434	\$35,938	\$37,738	\$39,575
Part A (12%) Income	\$1,871	\$1,887	\$2,305	\$1,508
Part C (5%) Income	\$0	\$0	\$0	\$2,728
Total (Mass. Net AGI)	\$36,305	\$37,825	\$40,043	\$43,811
Tax After Credits	\$1,844	\$1,923	\$2,080	\$2,178

Notes: Detail may not add to total because of rounding. Average deductions and exemptions are greater than the difference between total income and taxable income, because the deductions and exemptions of some taxpayers exceed their total income. Similarly, some taxpayers have excess credits, so that the average credits are greater than the difference between tax liability before credits and after credits.

The Average Non-joint (Single, Married filing separately, Head of household) Filers

In 1996, 1,747,347 Massachusetts income tax returns, or 59.0% of all filings, were from single individuals, married individuals filing separately and head of household individuals. The average Massachusetts non-

*The effective rate is calculated by dividing tax after credits by Massachusetts Net Adjusted Gross Income.

joint filer reported \$21,979 in 5.95% income, \$846 in 12% income, and \$1,159 in 5% income, for a total Massachusetts Net Adjusted Gross Income of \$23,984. After claiming \$5,563 in deductions and exemptions, the average non-joint filer had a total taxable income of \$18,685. This filer's 1996 income tax liability was \$995 for 5.95% income, \$99 for 12% income and \$57 for 5% income. The average non-joint filer claimed \$43 in tax credits, reducing the final state income tax bill to \$1,112. In 1996, the average non-joint filer's effective tax rate was 4.6%.

The Average Joint Filer

In 1996, 1,212,211 Massachusetts tax returns, or 40.1% of all state income tax returns, were filed by married couples filing jointly. The average Massachusetts joint filer reported a Massachusetts Net Adjusted Gross Income of \$72,391 of which \$64,940 was 5.95% income, \$2,462 was 12% income and \$4,989 was from 5% income. The average joint filer saw an increase of 10.9% in Massachusetts Net Adjusted Gross income in 1996. For 1996, the average joint return claimed \$10,328 in total deductions and exemptions, had taxable income of \$62,588 and accrued a total tax liability of \$3,824, of which \$3,282 was 5.95% tax, \$293 was 12% tax and \$249 from 5% income. The average couple filing a joint return claimed \$110 in credits from their tax bill, for a final Massachusetts income tax of \$3,715. The average joint filers' effective tax rate for 1996 is 5.1%, 0.3% lower than 1995.

The main characteristics of the average Massachusetts filer overall, the average non-joint filer and the average joint filer are summarized below in **Table II-B**. As shown below, the average joint filer received an income that is nearly three times higher than that of the average non-joint filer and paid three times more in taxes than the average non-joint filer.

Table II-B: Comparison of Average Filers in 1996

Items	Average Filers	Average Non-joint Filers	Average Joint Filers
5.95% Income	\$39,575	\$21,979	\$64,940
12% Income	1,508	846	2,462
5% Income	2,728	1,159	4,989
Total (Mass. Net AGI)	43,811	23,984	72,391
Deductions and Exemptions	7,523	5,563	10,328
Total Taxable Income	36,667	18,685	62,588
5.95% Tax	1,932	995	3,282
12% Tax	179	99	293
5% Tax	136	57	249
Credits	71	43	110
Tax After Credits	2,178	1,112	3,715
Effective Tax Rate	5.0	4.6	5.1

Notes: Detail may not add to total because of rounding. Average deductions and exemptions are greater than the difference between total income and taxable income, because the deductions and exemptions of some taxpayers exceed their total income. Similarly, some taxpayers have excess credits, so that the average credits are greater than the difference between tax liability before credits and after credits.

Median Income

Median income is the amount of income at the center of the income distribution, with 50% of taxpayers reporting more income than the median, and 50% reporting less. In 1996, the median Massachusetts Net AGI reported was \$26,387.

Chart II-2: Comparison of Median Income, Tax Year 1996

SOI Tables, Charts, and Explanatory Notes

This section consists of 66 statistical tables and 2 charts. Below are general notes on the data upon which the tables are based; definitions of terms, abbreviations and symbols used in the tables; and notes to which readers should refer when reviewing specific tables.

General

- Tax return data used in the *Statistics of Income* reflect the information on tax returns filed with the Massachusetts Department of Revenue. This includes all timely filed returns and returns filed under extension. The data do not reflect any changes that may have been made or that are likely to be made in the future as a result of audits. This is of particular relevance for high-income tax returns. Because of the greater complexity of these returns, there is a higher probability of error and more room for disagreement about the proper interpretation of tax laws.
- Obviously, the tax return data used in the preparation of this report do not capture the incomes of those who do not submit returns. As a result, the statistics for the lowest income classes tend to be understated as a measure taken from the entire population. This is because individuals and married couples filing jointly, who receive gross income less than \$8,000 generally are not required to file a Massachusetts income tax return, although some do file to claim a refund.
- Tax law and tax form changes may affect the year-to-year comparability of the data.
- Detail may not add to totals because of rounding.
- A seeming inconsistency in the tables which display tax is that some tax liability is reported in the lowest income class (under \$5,000). Since the Massachusetts Adjusted Gross Income threshold for No Tax Status (NTS) is \$8,000 for single filers, \$13,450 for joint filers, and 12,120 for head of household filers, it might seem that there should not be any tax paid by this income group.

However, as explained in the **Income Concepts** section of Part I of this report, the income classes used in these tables are based on Massachusetts *Net* Adjusted Gross Income, not on Massachusetts Adjusted Gross Income (AGI), which is calculated differently for the purpose of determining eligibility for No Tax Status. The key difference is that unlike AGI, which only allows 12% income connected with a trade or business to be offset by 5.95% losses, Net AGI allows *all* 12% and 5% income to be offset by 5.95% losses. As a result of this difference, under certain circumstances AGI can exceed the NTS threshold even when Net AGI is below the NTS threshold and/or negative. Thus, filers can have a Net AGI below \$5,000 and still incur a tax liability.

The vast majority of individuals in the class with income below \$5,000 reported low income from all 5.95%, 12% and 5% categories had no tax liability. Most of the tax reported in that class was reported by a small number of taxpayers who had substantial amounts of positive 12% or 5% income accompanied by large 5.95% losses. Also, a small amount of the tax reported in the lowest income brackets is accounted for by married taxpayers filing separate (MFS) returns, to whom No Tax Status provisions do not extend.

Terms, Abbreviations and Symbols

The following definitions reflect Massachusetts tax law in effect for taxable years beginning on or after January 1, 1996 and before January 1, 1997. For further clarification of the terminology used in this report, please refer to the Massachusetts 1996 Income Tax Forms in the **Appendix**, and to Chapter 62 of the *Massachusetts General Laws*.

#	Data not reported to maintain taxpayer confidentiality.
--	Data not available for publication.
5.95% Income	See Part B Income.
12% Income	See Part A Income.
5% Income	See Part C Income.
65-and-Over Exemption	A reduction of \$700 per person from adjusted gross income which taxpayers aged 65 and over receive.
Capital Asset	Generally, all property used for personal purposes or investment such as a personal residence or corporate stock. Capital assets do not include property held mainly for sale to customers or other property used in a trade or business.
Capital Gain or Loss	Profit or loss from the sale or exchange of capital assets. Prior to 1996, a 50% exclusion was applied to gains reported on assets held for more than one year, which were taxed at a rate of 12%. Starting in 1996, no exclusion is applied to long-term capital gains; however, the full amount of the gain is taxed at a lower rate (5% in 1996).
Credit.. ..	An amount which a taxpayer may directly offset against the tax determined on taxable income.
Deduction	An amount which a taxpayer is allowed to subtract from income.
Dependent	One who legally relies on a taxpayer for financial support. Generally, for Massachusetts tax purposes, a person is considered a dependent if he or she can be claimed as such on the taxpayer's federal income tax return. In a few cases, the number of dependents claimed for Massachusetts purposes and for U.S. purposes may differ. For U.S. tax purposes, a dependent exemption is not allowed for a person who would otherwise be a dependent but who files his/her own income tax return and claims a personal exemption. For Massachusetts tax purposes, a dependent exemption can be claimed for such a person.
Dependent Exemption	A reduction of \$1,000 per dependent from adjusted gross income.
Excess Revenue Credit (ERC)	Reduction in tax given to eligible taxpayers when state revenues exceed legal tax limit.
Exemption	An amount which is allowed as a reduction to adjusted gross income in calculating taxable income.
Filer, Filing Unit	An individual or married couple that submits an income tax return.

<i>Filing Threshold</i>	The income level at or above which a taxpayer is required to file a return. The filing threshold for married or single residents is gross income of \$8,000. Nonresidents are required to file a return if they receive Massachusetts source income in excess of the personal exemption multiplied by the ratio of Massachusetts income to total income. Minimally, this means that nonresidents must file if they receive Massachusetts source income in excess of \$2,200 if single, or \$4,400 if married filing jointly. The filing threshold may be much lower, however, if the nonresident earns only a small portion of income in Massachusetts.
<i>Gross Income</i>	All employee compensation; business, professional, or partnership income; rent, royalty, and real estate income; taxable pensions and annuities; alimony; interest and dividends; capital gains; gambling winnings; unemployment compensation; taxable portion of scholarships and fellowships; and all other income available for taxation.
<i>Head of Household</i>	A tax return status available to a married or unmarried head of household.
<i>Legal Residence</i>	The term 'legal residence' denotes the place of one's permanent home and to which, whenever one is absent, one has the intention of returning. Generally, the locale where the most important family, social, economic, political, and religious activities take place.
<i>Limited Income Credit (LIC)</i>	Special tax reduction given to eligible filers with Mass. Adjusted Gross Income between \$8,000 and \$14,000 if single, and between \$12,000 and \$21,000 if filing jointly. When determining eligibility for this credit, part-year residents must also include income received while a nonresident, while nonresident filers must include income from non-Massachusetts sources.
<i>Married Filing Jointly</i>	The tax return status of a married person who submits one tax return together with his or her spouse.
<i>Married Filing Separately (MFS)</i>	The tax return status of a married person who submits a return separately from his or her spouse.
<i>Massachusetts Adjusted Gross Income (Mass. AGI)</i>	An intermediate step between gross income and taxable income that reflects allowable deductions for certain expenses related to income production, losses and other items. All exemptions and other deductions are not allowed in the calculation of Mass. AGI. Mass. AGI is used to determine eligibility for No Tax Status and the Limited Income Credit.
<i>Massachusetts Bank Interest</i>	Interest received from Massachusetts bank deposits. Massachusetts bank interest is taxed at a rate of 5.95 percent.
<i>Massachusetts Net Adjusted Gross Income (Mass. Net AGI)</i>	Massachusetts gross 5.95% income after deduction of ordinary business expenses and certain other deductions related to the cost of producing income, and net of Massachusetts bank interest exemption (Massachusetts Form 1, Item 12), plus adjusted gross 12% income from interest, dividends, and some capital gains, plus adjusted 5% income from long-term capital gains. Mass. Net AGI is used solely to produce the Massachusetts <i>Statistics of Income</i> . It is distinct from Mass. AGI, which is used to determine eligibility for No Tax Status and the Limited Income Credit.

<i>Median Income</i>	The amount of the middle value in a distribution of income, above and below which lie an equal number of values.
<i>NA</i>	Not Applicable
<i>No Tax Status (NTS)</i>	The level below which no tax is imposed on a taxpayer. A single taxpayer qualifies if his or her Mass. Adjusted Gross Income is \$8,000 or less. A husband and wife filing jointly qualify if their Massachusetts Adjusted Gross Income was \$12,000 or less before 1996. In 1996 this amount is 13,450 plus \$1,000 per dependent for joint filers. For head of household filers, the no-tax status threshold increased from \$11,000 to \$12,120 plus \$1,000 per dependent. When determining eligibility for No Tax Status, part-year residents must also include income received while a nonresident, while nonresident filers must include income from non-Massachusetts sources.
<i>Nonresident (NR)</i>	One who maintains a legal residence outside of Massachusetts but receives income from Massachusetts sources.
<i>Part A Income</i>	Dividends, short-term capital gains, and interest from sources other than Massachusetts banks. Part A income is taxed at a rate of twelve percent.
<i>Part B Income</i>	Income from employment, profession, trade or business, trusts, pensions, annuities, Massachusetts bank interest, IRA/Keogh distributions, rental income or loss from real estate, unemployment compensation, alimony income winnings, and certain other sources. Part B income is taxed at a rate of 5.95 percent.
<i>Part C Income</i>	Income from long-term (held more than one year) capital gains excluding capital gains on collectibles. In 1996, part C income was taxed at a rate of 5%.
<i>PTNRSP</i>	Partnership
<i>Part-Year Resident</i>	One who has maintained a legal residence in Massachusetts for only part of the tax year.
<i>Personal Exemption</i>	A reduction in taxable income received by all filers. In 1996, personal exemption amounts were \$2,925 for single filers, \$5,850 for joint filers, and \$4,520 for head of household filers.
<i>Resident</i>	One who maintains a legal residence in Massachusetts.
<i>Single Filer</i>	An individual who submits a tax return for himself or herself.
<i>Tax Burden Ratio</i>	The proportion of Massachusetts net adjusted gross income used to pay taxes.
<i>Tax Liability</i>	The amount of tax that a taxpayer is required to pay for a given year. Generally, in this report tax liability refers to tax liability before credits unless otherwise specified.
<i>Tax Year</i>	The year in which income subject to tax is received. This usually corresponds to the calendar year.

<i>Taxable Income</i>	Amount to which the tax rates are applied in computing tax liability before credits, after subtracting allowable deductions and exemptions. For purposes of calculating tax, deductions and exemptions cannot reduce taxable income to less than zero dollars.
<i>Total Money Income</i>	The standard income definition used by the U.S. Bureau of the Census to measure the income of persons, households, and families. Includes money wages or salary, net income from self-employment, Social Security or railroad retirement income, Supplemental Social Security income, public assistance payments, interest, dividends, royalties, net rental income, veteran's payments, unemployment or worker's compensation, pensions, and other periodic cash income. Excludes receipts from the following sources: money received (including capital gains) from the sale of property, such as stocks, bonds, a house, or a car (unless the person was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); withdrawals of bank deposits; money borrowed; tax refunds; gifts; and lump-sum inheritances or insurance payments. Also excludes the value of non-cash benefits and transfers, such as food stamps, health benefits, and subsidized housing.

Notes to Specific Tables

Table	Item	Explanatory Note
Table II-1	Applicable Tax Rates	<p>In 1988 and prior years, Massachusetts gross income was divided into two income categories, Part B, taxed at 5% and Part A, taxed at 10%. In 1989, Part B income was divided into two classes: Part B (wages, tips and salaries; business, profession, trade or farm income; partnership and S corporation income; other income such as winnings, fees, etc.) taxed at 5.375% and Part C (pension and annuity income; alimony received; rental income from real estate; unemployment compensation; taxable IRA/Keogh distributions; and Massachusetts bank interest) taxed at 5%. In 1990, the distinction between Part B and Part C income remained, but both categories were taxed at 5.95%. In addition, the Part A rate increased to 12% from its previous rate of 10%. In 1991, the distinction between Part B income and Part C income was fully eliminated and Part B income was taxed at 6.25% and Part A income continued to be taxed at 12%. In 1992, the tax rate on Part B income was reduced from 6.25% to 5.95%, and Part A income continued to be taxed at 12%. In 1996, as part of a change in the way capital gains are taxed, gains on assets held for more than 1 year were reclassified as Part C income (as opposed to Part A income), and taxed at a rate of 5%.</p>
	(C)	<p>Denotes an income item classified as Part C income in 1989 and 1990 and subject to a 5% tax rate in 1989 and a 5.95% rate in 1990. (See above.)</p>

Table	Item	Explanatory Note
Table II-1	Partnership, S Corporation, and Trust Income (Loss)	Beginning in 1989, the rental income (loss) from real estate of partnerships, S corporations, and trusts, which previously was included in this category, is included in Rents & Royalties Income (Loss).
	Massachusetts Bank Interest	Beginning in 1989, Massachusetts Bank Interest includes interest on all Massachusetts bank deposits. Prior to 1989, interest from Massachusetts term or time deposits with a principal amount of \$100,000 or more was instead treated as Part A income. This treatment was ended by a November 1989 court decision.
	Interest After Exemption	Massachusetts bank interest after the allowable exemptions. The maximum exemptions are \$100 for individual returns and \$200 for joint returns.
	Unemployment Compensation	In 1988 and prior years, taxable unemployment compensation is included in Other 5.95% Income.
	Other 5.95% Income	For 1992, this category includes income such as winnings, fees, and taxable IRA/Keogh distributions, and other income not reported elsewhere on the Massachusetts return. For 1989, this category includes the following types of income taxed at 5.375%: winnings, fees, prizes and awards, ordinary net gain or loss, rental income or loss from tangible personal property and other income reported on U.S. 1040, line 22 not reported elsewhere on the Massachusetts return; and taxable IRA/Keogh distributions, taxed at 5%. In 1988 and prior years, rental income or loss from tangible property is included in Rents & Royalties Income (Loss). In 1988 and prior years, other 6.25% income includes unemployment compensation.
	Total Non-Wage and Salary Income	Total 5.95% income, excluding wages and salaries. Does not include non-Massachusetts bank interest, dividends, or capital gains, which are in the 12% or 5% income category.
	Capital Gains	Adjusted long- and short-term gains, after the deduction for long-term gains that was applied prior to 1996. Beginning in 1983, the long-term deduction is 50%. For tax year 1996, the 50% deduction was eliminated (except for gains on collectibles held for more than one year). Short-term gains were taxed at 12%, and long term gains taxed at 5%. Capital gains on collectibles taxed at 12% after the 50% deduction.
	Total Deductions, Total Exemptions	The total amount of deductions or exemptions available to filers for the purpose of reducing taxable income. Because some filers have deductions and exemptions which exceed the income against which they can be applied, some amounts of deductions and exemptions, in effect, go unused.
	Total Credits	The total amount of credits available to filers for the purpose of reducing tax liability. Because some filers have credits which exceed the tax liability against which they can be applied, some amounts of credits, in effect, go unused.

Table	Item	Explanatory Note
Table II-2	No Tax Status	The method used to determine the number of No Tax Status filers in the years 1986 to 1996 differs from the method used for prior years. The method used for years prior to 1986 slightly understates the number of filers claiming No Tax Status. The methodology used for 1986 and subsequent years accurately reflects the number of No Tax Status filers.
Table II-13		See notes to Table II-1.
Table II-14	Rent Paid, Rental Deduction	Excludes qualified Massachusetts rent paid by nonresident filers, but includes the rental deductions reported by nonresident filers.
	Early Savings Withdrawal	Deduction for penalties on early savings withdrawals.
	Exemption Items	The individual exemption items reported by nonresident filers are before apportionment to Massachusetts. However, in Tables II-1, II-6, II-7, and II-8, Total Exemptions are after nonresident apportionment.
Table II-20	Taxable Capital Gains	Adjusted long-term and short-term gains, after the 50% deduction for long term gains prior to 1996. This table was eliminated in 1996 as a result of the change in the way capital gains were taxed starting in that year.

Appendix: 1996 Massachusetts Income Tax Forms

FOR FULL YEAR RESIDENTS ONLY

PRINT IN BLACK INK

Ovals must be filled in completely. Example: Photocopies of this form are not acceptable. For the year January 1–December 31, 1996 or other taxable year beginning _____, 1996, ending _____.

Form 1 Massachusetts Resident Income Tax Return**1996**

FIRST NAME										M.I. LAST NAME										1. YOUR SOCIAL SECURITY NUMBER																			
SPOUSE'S FIRST NAME										M.I. LAST NAME										2. SPOUSE'S SOCIAL SECURITY NUMBER																			
ADDRESS																				CITY/TOWN/POST OFFICE										STATE					ZIP + 4				

Mass. Election Campaign Fund: ☐ \$1 You, ☐ \$1 Spouse, if filing jointly. Total ▶ \$ (This contribution will not change your tax or reduce your refund.) If taxpayer is deceased, fill in appropriate oval (see instructions): 1. ☐ 2. ☐

LINE 1 Filing Status: (Select one only) ☐ Single ☐ Married filing joint return (both must sign return) ☐ Married filing separate return. (Enter spouse's Soc. Sec. no. in the appropriate space above.)

2 Exemptions: ☐ Fill in if noncustodial parent ☐ Fill in if using whole-dollar method

a. Personal exemptions. If single or married filing separately, enter \$2,925. If head of household, enter \$4,520. If married filing jointly, enter \$5,850. a

b. Number of dependents. (Do not include yourself or your spouse.) Enter number ▶ × \$1,000. b
Enter dependents' Social Security numbers. See page 9 if born in 1996. _____

c. Age 65 or over before 1997: ☐ You + ☐ Spouse = ▶ × \$700. c

d. Blindness: ☐ You + ☐ Spouse = ▶ × \$2,200. d

e. Other: 1. Medical/Dental ▶ (from U.S. Sch. A, line 4) 2. Adoption ▶ (from worksheet) 1 + 2 = e

f. Total exemptions. Add items a, b, c, d and e. Enter here and on line 18 ▶ 2f

3 Wages, salaries, tips and other employee compensation (from all W-2 forms) ▶ 3

4 Taxable pensions and annuities (see instructions, page 10) ▶ 4

5 Mass. bank interest: a. – b. exemption = 5
Exemption: if married filing jointly, subtract \$200 from Total; otherwise subtract \$100 & enter result ▼ If showing a loss, mark over X in box at left

6 Business/profession or farm income/loss (enclose Mass. & U.S. Sch. C or C-EZ or U.S. Sch. F) ▶ 6

7 Rental, royalty, REMIC, partnership, S corp., trust income/loss (enclose Mass. & U.S. Sch. E) ▶ 7

8 Unemployment compensation (from U.S. return or U.S. Telefile worksheet) ▶ 8

9 Other income (alimony, taxable IRA/Keogh distr., winnings, fees) from Sch. X, line 4 (enclose Sch. X) ▶ 9

10 TOTAL 5.95% INCOME. Add lines 3 through 9. (Be sure to subtract any loss(es) in lines 6 or 7) . . . 10
▲ If showing a loss, mark over X in box at left

11 Amount paid to Soc. Sec., Medicare, R.R., U.S. or Mass. retirement

Not more than \$2,000 per person. a. You ▶ + b. Spouse ▶ a + b = 11

12 Child under age 15, or disabled dependent/spouse care expenses (from worksheet on page 12)
Enter provider's name(s) and ID number(s) ▶ 12

13 Dependent member of household under age 12 on 12/31/96 (only if not claiming line 12) ▶ 13
Enter one \$600 amount and the child's name _____

14 50% rental deduction (from the worksheet on p. 13). Not more than \$2,500. ▶ 14
Enter landlord's name(s) _____

15 Other deductions from Schedule Y, line 5 (enclose Schedule Y). ▶ 15

16 TOTAL DEDUCTIONS. Add lines 11 through 15 ▶ 16

17 5.95% INCOME AFTER DEDUCTIONS. Subtract line 16 from line 10. Not less than "0" 17

Attach, with a single staple, state copy of W-2, W-2G and 1099R.

17	5.95% INCOME AFTER DEDUCTIONS (from other side). Not less than "0"	17	<div style="border: 1px solid black; width: 100px; height: 20px;"></div>
